INTRODUCTORY

In presenting the First Edition of the TOWN OF LINDSAY DIRECTORY, we wish to thank the business people for their cordial support and the public in general for the courtesy extended our representatives who gathered the information. This Directory is very complete and as accurate as possible.

The number of names in the Alphabetical section is 3,952 which multiplied by 2½ (the usual figure used by Directory Publishers in estimating the number of inhabitants) gives a population of 9,880 for the Town of Lindsay including the outskirts.

The Directory will be published biennially.

We quote Special Prices to Clubs, Institutions, Parks and others who require seed in large quantities.

BOOK ON LAWNS AND GREENS

LAWNS AND GREENS

It is most important that the lawn should be sown with a mixture of grass seeds especially adapted for the purpose required. A mixture suitable for a Park or Golf Course would be quite unfit for a private lawn, Bowling or Putting green. All the finest grasses that are most suitable for the formation of a lawn when grown for seed, produce very much less weight of seed per acre than do the coarser growing varieties, consequently the cheaper the mixture the coarser the turf. We maintain that the finest dwarf growing grasses are the most economical even for large areas, as the turf formed by the dwarf compact habit of the finest grasses requires to be mown only about half as many times as a turf formed of coarser growing varieties.
